Index for Volume 62 (1991)

This index is composed of three subindexes: I. Bibliographic Index; II. Author Index; and III. Topic Index.

Entries in the bibliographic index have been indexed by the last name of the author or, in the case of multiple authors, by the last name of the first author. Reference information includes the name(s) of the author(s), title of the article, and the volume number and pages on which the article may be found.

The author index cites the name of each author included in the volume, followed by the volume number and pages of the article. In cases where the cited author is not the first author of the article, the first author is cited in parentheses so that the article may be located in the bibliographic index.

In the topic index, each article is listed under those important subjects about which the article provides information. The volume and page numbers are also provided.

I. Bibliographic Index

Alessio, Helaine M.; Hutchinson, Kathleen M.; Effects of Submaximal Exercise and Noise Exposure on Hearing Loss. 4, 413-419.
